Ammarah Khan

Punjab, Pakistan, +923018555949, khhaann.016@gmail.com

PROFILE

I am a Data Science student at PAF-IAST with a passion for coding and building practical software solutions. My academic journey combines programming with data analysis.

Programming & Software Development (C++):

- Hospital Management System
- Library Management System
- Employee Management System

Data Analysis:

- Performed statistical analysis and visualization for continuous and discrete datasets.
- Calculated variance, standard deviation, and probability distributions.
- Produced charts and graphs to interpret and communicate results.

EDUCATION

Sep 2025 — Present

BS Data Science, Pak-Austria Fachhochschule: Institute of Applied Sciences and Technology — Haripur

CGPA 3.56/4.00.

Relevant coursework: Discrete Structures, Fundamentals of ICT, Programming Fundamentals, Object-Oriented Programming, Calculus & Analytical Geometry, Probability & Statistics, Applied Physics.

Aug 2021 — Jun 2023

Intermediate: Pre-Medical, Superior Group of College — Mianwali

Higher Secondary School Certificate (FSc, Pre-Medical): Overall score 86.36%.

Strong foundation in Core Science subjects and Analytical problem-solving.

Aug 2019 — Jun 2021

Matric, Malik Azam Higher Secondary School — Mianwali

Secondary School Certificate (Matric), Science group, 98.63%.

Recognized for top performance; Strong foundation in Mathematics and Science subjects.

ACADEMIC EXPERIENCE

Dec 2025

C++ Programming

Implemented console-based C++ applications using data structures, control flow, and basic OOP; developed and optimized algorithms to solve programming problems and improve code clarity and efficiency.

Mar 2026

Data Analysis

Performed statistical analysis and visualization for continuous and discrete datasets; calculated variance, standard deviation, and probability distributions and produced charts and models to interpret results.

SKILLS

C++	Object-Oriented Programming
Descriptive Statistics	Probability Distribution
Microsoft Office (Word, Excel and PowerPoint)	Leadership
Problem Solving	Teamwork
Communication	Active Listening

SEMESTER PROJECTS

Hospital Management System

Designed a complete system for managing patient records and hospital appointments using procedural programming concepts. Implemented functions for data entry, retrieval, and report generation with structured data handling.

Library Management System

Built a book inventory system to track library books, including titles, authors, and availability status. Developed functions for adding/removing books, searching by category, and generating availability reports.

Employee Management System

Built a comprehensive system with three modules using core OOP concepts.

Employee ID Generation: Automated unique ID creation using static data members.

Tax Assignment System: Calculated employee tax based on salary tiers using encapsulation

Bonus Assignment System: Applied performance-based bonus logic using polymorphism and inheritance.

Tic-Tac-Toe Game

Developed an interactive two-player Tic-Tac-Toe game with win detection logic and board validation. Implemented game state management and user input handling with a clean console-based UI

Wireless Power Transfer

Developed a wireless charger for power transmission from scratch for an applied physics project.

HONORS AND AWARDS

Certificate of Completion: SimpliLearn (C++), summer upskill series 2026, ML internship certificate.

Certificate of Appreciation: Best performance in classes 8th, 9th, and 10th.

EXTRA-CURRICULARS

Project Lead

Coordinated a seven-member team to outline a startup framework based on market needs.

Best Performer in Badminton

at school level.

Sketching and Painting Competition

at school level.

LANGUAGES

Urdu

English

Turkish (Intermediate)
